CARE & MAINTENANCE FOR BON VIVANT

GLIDES

Our glides are constructed of high-quality materials including nylon, rubber, thermoplastic polyurethane, felt, or stainless steel. Glides can be fixed, adjustable or even self-leveling. Over time, the glides wear down and should be inspected frequently. If not, worn glides can damage the furniture and flooring. Wear rates vary on flooring type and texture. When possible, lift furniture (rather than dragging) to move it.

ROUTINE CARE & MAINTENANCE

- Inspect frequently
- Replace worn glides as needed
- Replacement glides are available through your sales specialist

ROPES, STRAPS & YARN

Our synthetic ropes and straps are made of olefin, polyolefin, polypropylene or polyester materials engineered using high-quality pigment with excellent UV, stain and mold resistance. These ropes have the same warm look and soft texture as high-end fabrics. They are environmentally friendly, durable and suitable for outdoor locations.

ROUTINE CARE & MAINTENANCE

- Frequent vacuuming or light dusting is recommended
- Dust can be wiped down with a damp clean cloth or rinsed with clean water
- Wash with mild, pH-neutral soap such as Dawn® and clean water or use Faron Cleaner (JeC Item #799-90-100-00-00). If using Faron, please follow directions on bottle.
- Let air dry
- Do not scrub excessively, apply heat or use any sharp objects to clean

EXTENSIVE CARE & MAINTENANCE

- Blot stains with a sponge, working inward from the outside of the stain
- Wash with mild, pH-neutral soap such as Dawn® and clean water or use Faron Cleaner (JeC Item #799-90-100-00-00). If using Faron, please follow directions on bottle.
- Rinse with clean water and air dry
